

Northern Great Plains Grassland Conservation Project

Partner Driven Projects

This partnership project (RCPP) includes Pheasants Forever, American Bird Conservancy, the Soil and Water conservation Districts of Montana, MT Department of Natural Resources and Conservation, World Wildlife Fund, Northern Great Plains Joint Venture, Montana Department of Fish, Wildlife & Parks, Montana Audubon and the Natural Resources Conservation Service.

Win-Win Solutions

Projects are intended to have positive outcomes to both livestock operations and declining grassland songbirds. Projects will increase forage availability and quality for sustainable livestock production, and improve habitat availability and connectivity between existing grasslands.

Available Conservation Practices:

- 340 Cover Crop
- 342 Critical Area Planting
- 512 Forage Biomass Planting
- 550 Range Planting
- 645 Upland Wildlife Habitat Management
