

Montana parents, we're here for you

Evening and weekend video-based care
for kids, without ever leaving home.

When you aren't sure if your kiddo is feeling good enough to go to school, camp, or extracurriculars, let our **Montana-based pediatric providers** take care of you and your family.

With a video visit from the comfort of home, you can get your family on the mend quickly, and help keep the kids and adults around them happy and healthy, too. **Learn more at montanapediatrics.org.**

why montana pediatrics?

montana pediatrics

"About three months ago my twins caught a bad respiratory virus and were experiencing some concerning symptoms. On a Saturday morning, going out with two sick kids and being stuck in a waiting room with other people seemed completely overwhelming for me. Instead, I logged into Montana Pediatrics' website and in a matter of minutes was connected to a pediatrician who helped me with a great treatment plan. Having the ability to be seen from the comfort of my own home, with a local doctor, all from my cell phone was incredible. This program has provided me with such peace of mind knowing my twins will be taken care of by someone both my own doctor and I can trust!"

- Montana mom of two
happy, healthy twins!
