

Western National Parks Grants & Scholarships

Applications Now Open — Deadline: December 31, 2025

Western National Parks (WNP), home to 72 national parks across 12 states, is now accepting applications for its 2025 Grant and Scholarship Programs. These opportunities honor the past and invest in the future by empowering the next generation of environmental leaders.

Educators across the region are inspiring students with hands-on learning that connects science, history, and sustainability to the living landscapes of our national parks. These programs help build momentum for conservation and highlight the vital roles that teachers, researchers, and advocates play in long-term environmental progress.
