

EXPLICIT INSTRUCTION

An Essential Component of Specially Designed Instruction

Lauren Holahan, MS, OTR/L, FAOTA

Occupational Therapy & Medicaid Consultant
NC Department of Public Instruction

Lynne Loeser, M.Ed.

Statewide Consultant for SLD and ADHD
NC Department of Public Instruction

COURSE DESCRIPTION

Explicit instruction is an evidence-based direct approach to teaching that includes both instructional design and delivery. It is characterized by a series of scaffolds where students are supported throughout the learning of a new skill until reaching independent mastery. It is a critical component of specially designed instruction for students with disabilities and for intensive intervention for all students.

COURSE OBJECTIVES

- Describe the research, elements and principles of explicit instruction
- Describe the features and relevance of the 3 components of an explicit instruction lesson
- Understand the features of appropriate practice
- Identify the features of explicit instruction in a lesson example
