Proposed K-12 Science Standards

Dr. Michael Maher, Deputy Superintendent of Standards, Accountability, & Research Dr. Kristi Day, Director, Academic Standards Dr. Charles Aiken, Section Chief for Science, Mathematics, & STEM Dreama McCoy, Section Chief, Office of Exceptional Children Dr. Tammy Howard, Director, Office of Accountability & Testing

State Board Policy SCOS-012

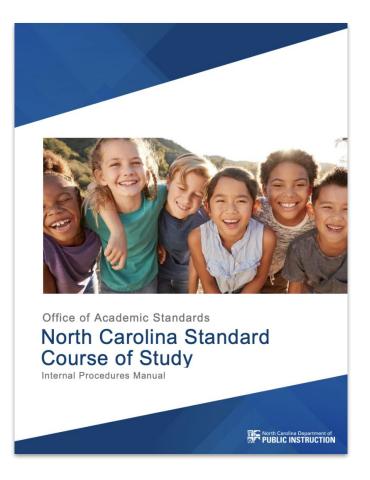

State Board Policy SCOS-012

- NCDPI facilitates the review of each set of content standards every five-to-seven years to ensure clear, relevant standards and objectives.
- NCDPI uses a uniform and formalized system built on four guiding principles:
 - Feedback-based
 - Research-informed
 - \circ Improvement-oriented
 - Process-driven

Internal Procedures Manual

Pages 17-23

Report For the Carolina Department of The PUBLIC INSTRUCTION

The Process

- Established by State Board Policy SCOS-012 and the NC Standard Course of Study Internal Manual first adopted in February, 2022 and revised in April 2023.
- Office of Academic Services received SBE approval to begin the review process in May, 2022 using a hybrid approach to complete the process.
- Emphasis was placed on the guiding principles:
 - Obtaining and using Stakeholder feedback
 - Research and data driven
 - Led by a community of NC Educators

Guiding Principles

Obtaining and using Stakeholder feedback

- 8 regional focus groups conducted with K-12 educators from each State Board Region.
- Interviews with community members, representative from institutes of higher education, civic groups, and professional science educator organizations.
- Advisory Team to support review of Draft 1
- 5 large scale surveys with 14,000+ responses
 - 2 All-Stakeholder Standard-by-Standard Surveys (2009 Standards and Draft 1)
 - 2 Public School Unit (PSU) Standard-by-Standard Surveys (2009 Standards and Draft 1)
 - 1 All Stakeholder Review of Draft 2

Guiding Principles

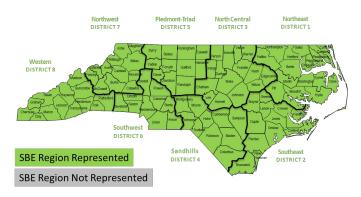

Research and data driven

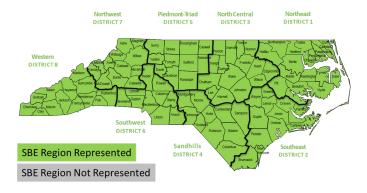

- Research of science standards from across the country, international standards, and frameworks from national science organizations
- Quantitative and qualitative analysis of stakeholder feedback provided by the Office of Learning Recovery for all interviews, focus groups and surveys
- Established a Data Review Committee to examine results and complete reports detailing finding and conclusions with recommendations for the Standard Writing Team.
 - DRC reports prior to the writing of each draft following stakeholder input on the 2009 Standards and Drafts 1 and 2 of proposed 2023 Standards.

Guiding Principles

Led by a community of NC Educators

- Data Review Committee(DRC) 27 members including classroom teachers, instructional coaches, school leaders, district leaders, non formal educators, members of Institutes of Higher Education representing all SBE Regions
- Standard Writing Team (SWT) Initially 39 members primarily represented by classroom teachers, with school leaders, instructional coaches, non formal educators, and members of Institutes of Higher Education representing all SBE Regions (Lost 4 members over the past year)

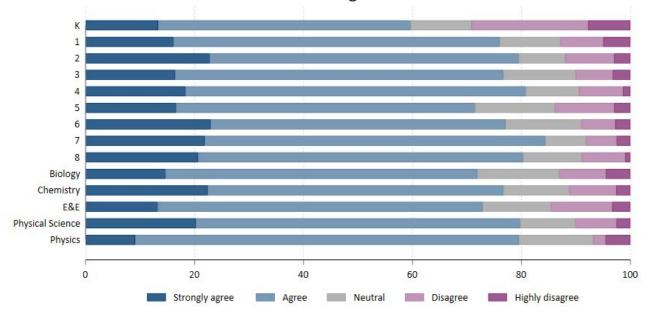

Draft 3 of Proposed K-12 Science Standards

- Followed same process used to developed Drafts 1 and 2
 - Feedback was collected through a single All Stakeholder Survey released from February 23, 2023 through March 26, 2023
 - Per the NCSCOS Manual the Draft 2 survey focused on 10 questions examining the draft standards and objectives as a whole with an opportunity for comments
 - Quantitative and qualitative feedback was reviewed by the Office of Learning Recovery
 - DRC met (virtually) in early April to complete a report with recommendations and conclusions
 - SWT met (virtually) in late April/early May review the DRC Report and to start work on Draft 3

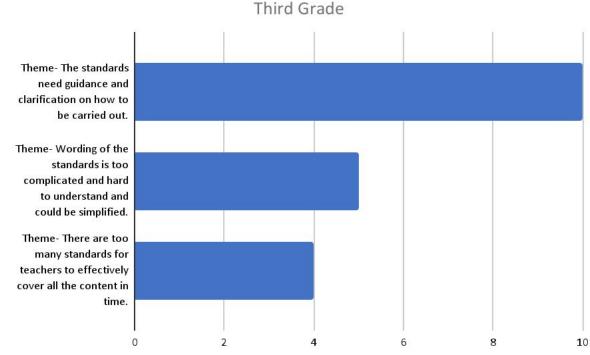

DRC Draft 2 Report & Analysis

Percentage with levels of agreement

The standards are written at an academic level of rigor appropriate for the grade level.

Qualitative Analysis identifying themes specific to comments still seeking improvements/revisions

Data Trends/Themes from DRC Report(s)

Quantitative and Qualitative Analysis identified initial trends across interviews, focus groups, surveys...

- Keep but streamline content from 2009 standards
 - Focus on the vertical alignment of the standards
 - Refinements to the placement of content within grades, grade bands, or courses
- Embed the Scientific and Engineering Practices to support real world applications
- Consistent use of language across strands and grade levels

Data Trends/Themes from DRC Report(s)

Feedback trends specifically from Drafts 1 and 2

- 1. Continued refinement in the wording and language within the standards and objectives to clarify the rigor and expectations.
- 2. Suggestions and requests for supporting documents and resources to support implementation of the new standards and objectives.
 - Boundary Statements, assessment examples, critical vocabulary(academic language) and descriptions of the Science and Engineering Practices,
- 3. Professional Learning
 - Training on Science and Engineering Practices
 - Training on Support Materials
 - Support for PSU learning communities (teachers and instructional leaders)

K-12 Science Standards Writing Team

Standards Writing Team:

- Began working in early October and met immediately after the DRC completed their reports.
- Worked in teams by grade band or course to address conclusions and recommendations from the DRC Report to create each draft.
- Engaged in vertical conversations prior to each draft being released.
- Worked alongside the Extended Content Standards writing team.

Draft 3 Revisions/Improvements

- Clarified wording of certain standards and objectives to improve readability
- Examined vertical alignment
- Provided additional suggestions and notes to NCDPI staff for future support materials and professional development.

Draft 3 of the Proposed K-12 Science Standards

	2009 Standa	ards	DRAFT 3 2023 Standards		Matter and Its Interactions	DRAFT CHEMISTRY CROSSWALK	
Grade level	Standards	Objectives	Standards	Objectives	2023 Standards/Objectives	2009 Essential Standards/Clarifying	Notes
Kindergarten	4	14	5	11	-	Objectives	
1st	5	12	5	10	PS.Chm.1 Analyze the structure of atoms and	Chm.1.1 Analyze the structure of atoms	
2nd	5	13	5	13	<i>isotopes.</i> PS.Chm.1.1 Use models to explain how the scientific understanding of atomic structure has evolved. PS.Chm.1.2 Use models to compare nuclear reactions including alpha decay, beta decay and gamma decay; nuclear fusion and nuclear fission.	and ions. Chm.1.1.1 Analyze the structure of atoms, isotopes, and ions.	
3rd	7	18	8	19			
4th	7	18	8	20			
5th	7	19	6	16		Chm.1.1.4 Explain the process of radioactive decay by the use of nuclear equations and half-life.	
6th	7	21	8	26			
7th	5	21	6	23			
8th	8	22	8	23	PS.Chm.1.3 Use models to explain how electrons are distributed in atoms. PS.Chm.2 Understand the physical and chemical properties of atoms based on their position in the Periodic Table.	Chm.1.1.2 Analyze an atom in	
Biology	11	31	10	27		terms of the location of electrons.	e location of
Chemistry	7	31	7	20		Chm.1.1.3 Explain the emission of electromagnetic

Physical Science	8	30	8	34		Chm.1.3 Understand the	
Physics	8	29	7	19		physical and chemical properties of atoms	
TOTAL	99	309	101	289		based on their position in the Periodic Table.	

Standards that Engage and Build Durable Skills

Scientific & Engineering Practice	How students are engaging with science?		
Ask Questions and Define Problems	Asking and refining questions to clarify what is needed to test ideas about the natural world or find solutions to solve engineering problems.		
Develop and Use Models	Using or constructing models to represent ideas, develop new questions and revise scientific explanations or proposed engineering systems.		
Plan and Carry Out Investigations	Planning and carrying out data driven investigations through labs and field experiences in/out of the classroom working collaboratively as well as individually.		
Analyze and Interpret Data	Analyzing data using tools, technologies, and/or models in order to recognize patterns and make valid and reliable scientific claims		
Use Mathematics & Computational Thinking	Using mathematics to recognize, express, and apply quantitative relationships.		
Construct Explanations	Apply scientific ideas, principles, and/or evidence to explain phenomena and solve design problems.		
Engage in Argument from Evidence	Listening to, comparing, and evaluating ideas and methods based on evidence.		
Obtain, Evaluate, and Communicate Information	Using multiple sources of information to obtain, critique and communicate ideas visually, verbally, or in writing, both individually and in groups.		

Standards that Engage and Build Durable Skills

Science Extended Content Standards

Dr. Carol Ann Hudgens, Senior Director Office of Exceptional Children Dreama McCoy, Section Chief Supporting Teaching and Related Services Matthew Martinez, Consultant for Significant Disabilities

Every Student Succeeds Act

- A state's academic achievement standards describe how much students are expected to learn in order to be proficient on a state's general assessment. Alternate academic achievement standards set an expectation of performance that can differ in complexity from a grade-level achievement standard.
- ESSA determined the cap for students instructed towards alternate academic achievement standards at 1.0 percent of total assessed population to be considered students with significant cognitive disabilities

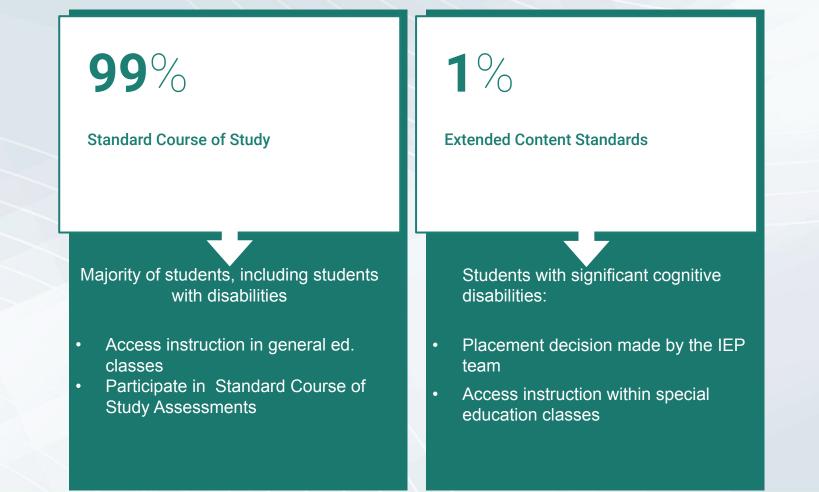

Students with Significant Cognitive Disabilities

Meet these 3 criteria established by North Carolina

The student's disability significantly impacts cognitive and adaptive behaviors, defined as those skills which are essential for someone to live and function independently The student requires extensive and repeated individualized instruction and support to make meaningful gains. The student uses substantially adapted materials and individualized methods of accessing information in alternative ways.

Graduate high school with a certificate of completion, not a high school diploma

Course of Study Comparison

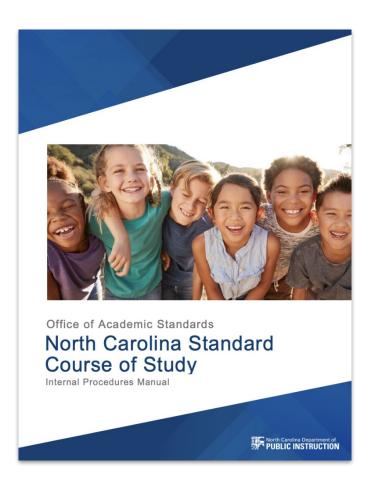

Our students instructed towards the ECS

Are able to learn
Need more time
Need more practice
Need opportunities
Need teachers who are experts in
standard based learning
Need a mode of communication

Writing Stakeholder Groups

	ades Middle School	High School Biology	High School Earth / Environmental Science
--	--------------------	------------------------	--

Draft 3 of Proposed K-12 Science Extended Content Standards

- Followed similar process as Standard Course of Study
 - Feedback was collected through a single All Stakeholder Survey released from February 23, 2023 through March 26, 2023
 - Survey focused on 10 questions examining the draft standards and objectives as a while with an opportunity for comments
 - Quantitative and qualitative feedback was reviewed by the Office of Exceptional Children
 - SWT met (virtually) in late April/early May review the results and to start work on Draft 3
 - OEC final changes based upon Internal and External Feedback

Proposed change to High School

Proposed High School Courses
Biology A
Biology B
Earth and Environmental Science
E

The Positives

- Collaboration provided the ECS Writing Teams the Science instructional knowledge for rigorous, yet attainable standards and objectives for all learners
- Provides a model for how districts can include all teachers in professional learning and instruction resources sharing
- Instructional resources can be purchased for all classrooms

OEC Process Words from the Field

Testing Timeline: Development

- Train teachers and content experts to write items aligned to the new science content standards in summer 2023
- Contract with teachers and content experts to write test items for embedded field testing in the 2023-24 science tests (after SBE adopts science content standards)
- Engage teachers and content experts to recommend test specifications in Fall 2023

Testing Timeline: Implementation

- Build and administer new operational assessments for the 2024-25 school year
- Engage teachers and content experts in standard setting workshops to recommend academic achievement levels in July 2025
- Recommend academic achievement levels to SBE for adoption in August 2025
