# INTRODUCTION

## WELCOME TO THE FIRST ANNUAL STANDARDS INSTITUTE!

The Office of Academic Standards receives many requests from the field for standards-based professional development. We heard you and responded by providing PSUs with this Standards Institute. During the NCSCOS content area sessions, participants will be guided through all content area standards, from unpacking to instructional practices. These sessions aim to provide new and veteran teachers, coaches, and leaders a comprehensive understanding of the NCSCOS.

We hope you enjoy your Standards Institute experience and look forward to any feedback we receive.

# INSTITUTE LOGISTICS

Two sessions will be offered simultaneously. One session will be from the NCSCOS content areas, and one will be from other areas of the agency, including legislation, programming, or initiatives. Each content area session is offered one day, and other sessions are offered on both days.

Name: \_\_\_\_\_

Standards Institute

---

*August 1-2, 2024*

For your convenience, we created a digital notebook where you can store and share your learning from the institute.

We look forward to your feedback so that we can better support you as you implement the standards, programs, and initiatives in your PSUs. At the end of each session, there will be an opportunity to provide us with that feedback through a common survey.
