

October is National Bullying Prevention Month, and Life Changing Experiences (LCE) is pleased to again collaborate with the NC Center for Safer Schools (CFSS). LCE, whose immersive educational programs address the challenges facing our students while helping build safer, healthier school communities.

These engaging prevention programs are fully funded and available at no cost to your school:

- **Free 2 Be | Grades 6–8:** Bullying prevention, empathy, and respect. [Watch video](#)
- **Addicted to Life | Grades 9+:** Drug and alcohol prevention and informed decision-making. [Watch video](#)
- **Cinema Drive | Grades 10+:** Safe driving, including distracted and impaired driving prevention. [Watch video](#)

LCE combines immersive 3D films, compelling storytelling, and individual handheld keypads to turn students into active participants—not just viewers.

Free 2 Be and Cinema Drive were developed with experts from The Children's Hospital of Philadelphia.

LCE's programs receive satisfaction ratings of over 80%, and evaluation data shows that at least 18% of participating students report a positive shift in their intention to make safer choices.

Hosting is simple - With all program costs covered, your school only needs to provide a darkened hall or auditorium. LCE supplies all audiovisual equipment and certified facilitators. Schedule up to three 60–90-minute sessions a day, choosing one topic for all students or different topics for each grade level.

School leadership receives a quantitative report on knowledge gained and shifts in behavioral intentions, with all student responses anonymous and confidential.

I invite you to bring this engaging experience to your students and support safer choices and a healthier school community. For more information or participate contact John Van Arnem at JVanarnam@cfssnc.gov or [984-392-6304](tel:984-392-6304)
