### Multiple Choice Assessment

Create multiple-choice assessments on a variety of topics.

### Questions Generator

Create questions for a specific piece of content.

### Discussion Prompts

Craft engaging prompts to stimulate meaningful classroom discussions.

### Lesson Hook

Plan compelling lesson starters to engage students.

### Make It Relevant

Link lesson content to students' lives and interests to boost engagement.

## Khanmigo simplifies AI.

Unlike ChatGPT, Khanmigo is designed by educators for educators. No prompt engineering is required. Educators get the highest-quality AI-powered teaching tools available. Teachers can easily get fresh ideas to engage students, prep for subs with detailed lesson plans, and differentiate for multiple classes in minutes.

## Free up teacher time and energy. Support teacher well being.

No complex prompts to learn or conquer. With Khanmigo as a planning ally, teachers can slash prep time, reduce burnout, and free up their energy. Teachers can do what matters most -- build meaningful student relationships and focus on improving learning.
