

NEW SUSTAINABLE SOURCE OF REIMBURSEMENT FOR SCHOOL DISTRICTS THROUGH THE NORTH DAKOTA MEDICAID ADMINISTRATIVE CLAIMING (MAC) PROGRAM

The North Dakota Department of Health and Human Services (NDDHHS) is working with Public Consulting Group (PCG) to implement a new program that will allow North Dakota school districts to receive additional Medicaid reimbursement for activities that your staff are **ALREADY** performing on a regular basis.

This program can create a **SUSTAINABLE** source of reimbursement to replace lost funding such as Elementary and Secondary School Emergency Relief (ESSER) and **WILL NOT** affect other sources of reimbursement or funding your district may already be receiving.

Eight (8) virtual information sessions will be held during early October. Please click on the link below to learn how your district could receive annually between \$8.00 - \$12.00 of reimbursement per student (total student population).

Registration Link: [NDMAC Introduction and Overview](#)

Business Managers, Special Education Administrators, and Superintendents are invited to attend. If you have any questions about this new important funding source, please feel free to contact PCG at NDMAC@pcgus.com or (717-884-7746).
