Accessing Campus Community

Campus Community is where Infinite Campus houses their on-demand training courses, their knowledge base and other resources. It is also where users can sign up for live training sessions.

The District Lead submits a list of staff to Infinite Campus to establish their Campus Community accounts. There is no notification from Infinite Campus to the individual users when the account is established. Verify with your district lead that your name was added.

These instructions apply to accessing Campus Community **until the district's Infinite Campus production site is set up**. Once the production site is set up, you will access Campus Community from within the production site. Until then, follow these steps.

To access Campus Community:

1. Go to Community Login (https://community-login.infinitecampus.com/)
2. From the Screen below, select 'click here' in the 'Email' box

3. You will be prompted for your email address (this is the address your district team lead submitted to Infinite Campus). Enter your email and hit submit.

Campus Community login via email

Any user with an existing Campus Community account can request an email with a one-time login link to access Community.

This is an alternative to accessing Community through the SIS.

Enter your email address that is associated with your SIS. You will receive an email with a link to log into Community. The link will be valid for 30 minutes.

Email address

Submit

If an account exists for that email address, an email will be sent.

4. You will receive an email from Infinite Campus (usually within a minute). Click the link in the email to access Campus Community. If you don't get the email response, check your junk folder. If you still don't see it, verify with your district team lead that your name was submitted to Infinite Campus.

Steve,

A request has been made to authenticate to Campus Community with this email address.

Click this link to access Campus Community.

This link will be valid for 30 minutes.

If you did not initiate this request, you can disregard this message.
