

The conservation challenges that we face today need an adaptive approach that changes with the challenge.

2019-2020

# NJ CONSERVATION LEADERSHIP PROGRAM

New Jersey faces many conservation challenges. From development and habitat fragmentation to sea-level rise and invasive species, the environmental issues in our state are complex. The NJ Conservation Leadership Program provides conservation professionals with an extraordinary leadership learning experience. The knowledge gained will help graduates better address emerging conservation issues in New Jersey.

## IMMERSIVE TRAINING TO DEVELOP EXCEPTIONAL CONSERVATION LEADERS

- Become more effective leaders in conservation
- Discover new ways to handle conflict
- Understand the value of emotional intelligence
- Develop new approaches to accept and deliver change
- Develop a network of support within New Jersey's conservation community
