

Assistive Technology (AT) and Durable Medical Equipment (DME) Needs When Oklahoma Disasters Occur

The Oklahoma ABLE Tech Device Reutilization Program assists in all steps and scenarios. Reutilization Direct: 405-967-6010 | Toll-Free: 800-257-1705 | www.okabletech.org

AT/DME is lost, left behind, or destroyed

The Oklahoma ABLE Tech Reutilization Program will help the Evacuee in one of several ways:

- Complete an application to receive available ABLE Tech AT/DME for temporary or permanent replacement
- Contact the original vendor if deemed a National Emergency and assist with the replacement of AT/DME
- Contact the State Equipment Cache for temporary or permanent replacement of specific items (canes, walkers, bedside commodes, and shower chairs) if available
- Seek alternate donations and funding through AT/DME vendors, churches, and other nonprofits

AT/DME is damaged, but repairable

The Oklahoma ABLE Tech Reutilization Program will help the Evacuee in one of several ways:

- Complete an application to receive available ABLE Tech AT/DME for temporary or permanent replacement
- Provide resources of local AT/DME vendors for repair
- Contact the State Equipment Cache for temporary or permanent replacement of specific items (canes, walkers, bedside commodes, and shower chairs) if available
- Seek alternate donations and funding through AT/DME vendors, churches, and other nonprofits for temporary or permanent replacement
- Deliver repaired AT/DME to the Evacuee and retrieve any loaned equipment for reuse.

Note: Specific AT/DME (canes, walkers, bedside commodes, and shower chairs) which have been in ABLE Tech Reutilization Inventory for 180 days and have NOT been matched to an Oklahoma resident will be donated to the State's Equipment Cache for use during Oklahoma disasters.
