

Therapeds is a therapist-owned company that supports School Districts in hiring contract therapists. We know the challenge of hiring skilled therapists/SSPs as well as the need for ongoing contractor management/support during the school year.

Virtual Providers that are currently available for full or part-time work:

**4 School Psychologists
11 Occupational Therapists
5 Speech Therapists
2 COTAs**

As therapists ourselves, we understand the value of in-person therapy. However, we also believe in the benefits of virtual therapies, which still meet IEP service time, support staff, and meet the needs of students. The virtual world is a continual evolution of resources.

We are happy to reach out to some of our local contacts and therapists in your area. With the shortage of SSPs across the nation we have found other avenues such as social media and therapist-oriented platforms to tap into.

Please pass along our information to your hiring team which oversees SSPs and feel free to reach out with any questions you may have.

Warm regards,

Karyn Weakliem, OTR/L
