

Post-Acute Care Quality Reporting Programs

SNF QRP: Review and Correct Report & Confidential Feedback Report Issues

An issue has been identified with the SNF Review and Correct Report. If one or more modification records are submitted for a patient stay, the most recent submitted assessment, which was accepted by the Assessment Submission and Processing (ASAP) system on or prior to the submission deadline for quarters one and two of CY 2017, is not being used in the measure calculation. Therefore, the measure results on the SNF Review and Correct Report are not being updated to reflect any changes in the measure outcomes based on the most recently submitted assessment. This applies to all measures on the SNF Review and Correct Report. Please note that refreshes on the calculations occur on Mondays.

Please note, this report was created specifically for SNF Providers.

A second issue has been identified in the coding of one measure contained in both the SNF Quality Measure (QM) and Review Correct Reports which affects the calculation of the measure, Application of Percent of LTCH Patients with Admission and Discharge Functional Assessment and a Care Plan that Addresses Function (NQF#2631). As a result, the data is currently being recalculated and retested for this measure in both reports.

Support staff are working to resolve these issues. A follow-up message will be sent as soon as these are resolved and further guidance can be given.

If you have questions concerning this information, please contact the QTSO Help Desk at help@qtso.com or 1 (800) 339-9313.
