

Put Paper in the Rearview!

Starting July 1, 2025, Oklahoma began issuing electronic titles to consumers. Scan the QR code to learn more about buying, selling, or transferring a vehicle with an electronic title.

What should you expect when registering your new vehicle?

- If you bought a new car with a **Manufacturer's Certificate of Origin** or a used car with a paper title, nothing has changed. Bring your documents to a licensed operator (tag agent) within two months to complete registration
- If your vehicle has an electronic title, the dealership will give you an **Electronic Title Bill of Sale**. Bring it, along with your other registration documents, to a licensed operator within two months

With registration, your title will be issued electronically. If your vehicle has a lien, the lienholder will hold the electronic title. **New!** If there is no lien, you may request a paper title if you prefer one. View your title anytime by creating a customer account at **OkCARS.service.ok.gov**.
