# Important eTAG and webDEALER Update

The Texas Department of Motor Vehicles (TxDMV) will update the eTAG system (the system used for Buyer Tags).

This change will move eTAG into webDEALER (the title application system). webDEALER will become the system to work from for the creation of Buyer Tags (or other tags). **Note:** Your current username and password will not change.

## For eTAG Only Users

- **ALL** eTAG users will log in to webDEALER **with their current eTAG username and password** to access eTAG even if they have not previously used the webDEALER system.
- Buyer Tags for out of state purchasers may be paid for online by credit card.
- All tags printed through eTAG will have improved security features.

## For webDEALER Only Users

- **ALL** webDEALER users will log in to webDEALER as usual **with your current username and password**.

## For Users of Both eTAG and webDEALER

- If you use **both** webDEALER and eTAG, you will be able to create title applications and issue Buyer Tags (or other tags) without having to log into different systems.
- Buyer Tags for out of state purchasers may be paid for online by credit card.
- All tags printed through eTAG will have improved security features.
