Data Management Center (DMC) Application

- **The 'View L1.5 Filter Details' under 'Monitor Validations' has been updated to include an 'Updated' date/timestamp.**

- **The 'View L2 Validation Rules Count' under 'Monitor Validations' has been updated to correct an issue where LEAs that had completed their L2 validations without any errors were getting "No validations have been run" message.**

- **The DMC LEA dropdown menu for ESCs has been updated to correct an issue where the ESCs were seeing their LEAs listed more than once.**

- The 'Regenerate' feature under 'Manage Applications, Keys, and Secrets' has been updated to correct an issue where the Claim Set's associated 'Profile' was not displaying.

- The 'Date Generated' on the 'Manage Applications, Keys and Secrets' view has been updated to show the correct date when editing or updating the application.

- The 'Map Descriptors' view has been updated to correct an issue where LEAs that were using the 'local.texas.gov' or 'ed-fi.org' namespace were triggering a L1.5 filter but were unable to map them to a TEA value.

- A new 'Unaffiliated Staff' report has been added under 'View Reports'. This will indicate any staff members who are missing the StaffEducationOrganizationEmploymentAssociation entity. A staff member who is missing this entity may not be promoted to TSDS.

- A new DMC 'Unaffiliated Student' report has been added under 'View Reports'. This will indicate any students who are missing the StudentSchoolAssociation and/or StudentEducationOrganizationResponsibilityAssociation entities. A student who is not affiliated with at least one of these entities may not be promoted to TSDS.

- The Load Summary under 'View Reports' now includes:
  - The last updated date/timestamp for ESCs and LEAs.
  - Any entity with a zero count.
  - The ability for ESCs and LEAs to export the results of these pages into a XLSX file.

- The 'Validation Summary' under 'View Reports' has been updated to allow ESCs and LEAs to export the results to a XLSX file.

- The 'Monitor Validations' view has been updated with a new filter option titled, "Rerun UID Filters". This allows a user that has updated information in the Unique ID application to run this process to have their data re-filtered against the data in their IODS.
