**What can I do
today?**

This week it is ...stones

Wednesday

Stone Cairns

- Stone Cairns are manmade stacks of stones that can often be found on top of mountains as landmarks.
- Why not make your own stone cairn at home to mark walks you've been on?
- Each time you go on a walk search for a stone to add to your pile.
- Ask your child to think about what kind of stone they are searching for? What will balance well? Does it need to be smooth or bumpy? Flat or round? Wide or small?
