**What can I do
today?**

This week it is ...toys

Sunday

Natures toys

- There are lots of “toys” provided by nature. Some will need to be used outside and some can be brought inside to be played with. They can be used to make into other things or just to be examined, touched, and explored.
- Leaves – look at the different shapes and colours. The sounds they make when touched, their texture. They can be used to make patterns and pictures with.
- Explore shells. They can be collected and used in lots of sorting, counting games and stories.
- Sand and mud can be explored and used to build with.
