**What can I do
today?**

This week it is ...flowers

Wednesday

Changing colours

- Some flowers will change colour if you add food colouring to their water.
- This works best with white flowers, you could try different types such as carnations or daisies.
- Place your flowers in a cup or container with water and add some food colouring. You may wish to try different colours to see what works best.
- It will take roughly 24 hours for the change to occur.
- Ask your child why they think it is happening?

ALWAYS check flowers are safe to pick (check the internet for toxic plants and flowers) It is often illegal to pick wild flowers – check first or pick from a garden with permission.
