**What can I do
today?**

This week it is...paper straws

Thursday

Blow paint

- Use your paper straws to make interesting effects with paint. Make sure that you blow and not suck the paint up! You may need to practice this using water first.
- You can put lots of different coloured paint on paper and blow to mix the paints. The harder you blow the further the paint will spread.
- Add some washing up liquid to the paint (really make sure you don't suck!). Blowing this paint will make bubbles. Place paper on top of the bubbles and you will have bubbles patterns. You can use these to make pictures of clouds, bath time, smoke etc...
