**What can I do
today?**

This week it is...cups

Monday – build it up

- There are lots of building challenges you could try out using paper cups. Here are a few:
- See how high you can build a tower with cards in between, supporting each cup. You can use old greetings cards for the supports. When the tower is as high as you can build pull the cards out and watch the cups fall. Can you use different supports in between the cups? You could try two lolly sticks.
- Find out how many cups high you can build a tower with no supports. Have fun knocking it down.
- Can you build a tower that gets narrower the higher you build it?
- You could use the cups to make support for a bridge for your cars or toys to travel over.
