What can I do today?

This week it is... Ice

Sunday

Ice sculpture

- Fill a range of different size ice cube trays/containers with water.
- Add a few drops of different coloured food colouring to the water in each container.
- Freeze overnight.
- When the water is frozen, and you are ready to play, tip it out onto a tray or into a large bowl.
- See what amazing sculptures your child and you can create.
- Maybe they would like to build an ice tower? How big will it be?
- When you have finished, why not take a photo of your sculpture?
- How long do you think it will take to melt?
