**What can I do
today?**

This week it is... Ice

Thursday

Arctic World

- Fill several different size empty containers and ice cubes trays with water and put them into the freezer.
- When all water is frozen, tip them out into a larger container and start building your arctic world.
- Why not build an igloo.
- You might like to save some ice for making icebergs.
- You could put some water in the container and add blue food colouring to make it look like the sea.
- When you have built your scene, start to add your figures.
- What animals will be in your arctic world, polar bears, penguins, seals, sea animals.....
