

BLACK HISTORY IN MATHS

CELEBRATING
THE BRILLIANT

**THOMAS
FULLER**

BIG IDEAS

**LONDON
MATHEMATICAL
SOCIETY
EST. 1865**

Tuesday 22 October

These cross curricular online events will bring together maths and history to celebrate the genius of Thomas Fuller.

Sold into slavery as a child in 1724 – three hundred years ago this year – Thomas Fuller became famous around the world for his exceptional skill in calculations.

As well as discovering his story, participants will meet Professor Nira Chamberlain OBE, founder of Black Heroes of Mathematics and our special guest speaker.

Nira will explore what ‘mental maths’ actually means, how the skill is developed and whether it is still useful today, as well as setting mental maths challenges during the workshop.

Register your class for a free, 50 minute workshop by clicking the buttons below:

10am

2pm

Everyone is welcome

Maths challenges will be suitable for upper primary school pupils

Get ready to exercise your mental maths muscles...
