

SEND Support from Origin

Origin provides opportunities for teachers of mathematics from mainstream, Special Schools and Alternative Provisions to collaborate and explore ways of supporting children with SEND to engage, overcome barriers and make progress in mathematics.

Support includes:

- sessions on specific areas of need such as supporting pre-verbal learners and students with dyscalculia and maths difficulties
- resources including case studies from other schools and schemes that support children with SEND
- bespoke support for schools from SEND specialists focussing on specific areas of need.

For details on sessions and resources or to find out how Origin can support the teaching and learning of maths in your school, click here:
