

# Community Assets

## Come and have a chat

Working with our Communities for our Communities

### Join our community conversation

The Community Assets Service works within the hearts of your communities and includes services such as Streetscene (grounds maintenance, street cleansing, burial grounds, play areas and open spaces), public toilets, crossing patrols, community facilities and the joint working with hundreds of fantastic community groups across the region to improve local areas where we live.

We would like your input, thoughts and assistance on how our services are performing within your local area - **everyone is welcome.**

Our sessions will include a presentation and discussion and are for anyone who would like to learn more about the Community Assets Service and speak directly with a member of our team.
