

# Introducing Dumfries and Galloway's New Garden Waste Collection Service

Help us make sure your garden waste is recycled

**Permits now available**

We are launching an opt-in fortnightly kerbside collection of garden waste. This is an easy way to recycle your garden waste and saves a trip to your local recycling centre.

Taking part in this new service will make sure your garden waste is composted and could free up space in your grey-lidded bin. This helps the environment and our region.

**The cost of a permit for collections between 1 March to 30 November 2025 is £40 per bin**

Visit our website or call for details and latest information.
