

Your Voice Counts

Are you living with a long-term condition?
Has the way you access health and care services changed during Coronavirus?
Has it been easier?
Have you struggled to access some services?

If you can identify with these questions then we want to hear from you!

We are researching experiences and will take our findings to the people making decisions about health and care in Gloucestershire. Take part and share your experience of accessing your usual healthcare during Coronavirus. Help us to identify the impact Coronavirus has had on your ongoing health and care support and inform the future of services.

Here are some ways you can take part:-

- Share your Corona Diary in writing, audio or video
- Be creative and express your experience through art, poetry, photography etc
- Join a Focus Group on Zoom or request a private conversation with one of our team
- Complete our survey

Some lucky participants will receive high street vouchers up to the value of £100.

We need to understand your Coronavirus experience. We can only make a difference if people tell us about their experience. Your voice counts.
