

Westgate Street Cathedral Quarter Improvement scheme

Current condition of Westgate Street

Here is what we are going to do:

In collaboration with Gloucester City, Historic England, we will be undertaking repairs and enhancement works around the Cathedral Quarter. This will involve repairs and resurfacing the current block paving around College Street with Berkeley Street junction by lifting the existing stones and replacing initially with black a tarmac base in preparation of a new coloured surface coat to be laid early April ahead of being able to install new planters with trees and seating areas. Some examples of the streetscape aspirations can be see below.
