

VIRTUAL WORKSHOP

# BUILDING YOUR BUSINESS IDEA WITH NO CODE

6 APRIL 2022 17:30

TARAS LANCHEV  
FOUNDER  
OF ERISED

**So you have a business idea that's centred around an app or website but you don't know how to code?** Fear not. It's possible for you (yes, you!) to create a first version of your app or website with **no coding necessary!** This is all thanks to what's known as *No-Code solutions* like *Bubble.io*, and lucky for you, we've teamed up with expert Taras Lanchev of Erised.io for a **free workshop** to help you get started.

## WHAT IS NO-CODE?

Our everyday life is powered by code – whether you're checking your bank balance or liking a friend's Instagram post. These actions are made possible by coding and programming. However, no-code development platforms like *Bubble* and *Webflow*, have transformed web development through easy-to-use visual (often drag and drop) interfaces. And thanks to these platforms, anyone is now able to build a website or an app without coding.

## ABOUT THE WORKSHOP

In this workshop, experienced Software Engineer Taras Lanchev will guide you through the wonderful world of no-code and help you get started planning for and building your web application.

### DATE

Wednesday 6th April, 17:30 -18:30

### LOCATION

**Virtual** (via Zoom).
