

# Step into green employment

**Manchester has a vision for a healthy, green, and productive city where everyone can thrive.**

Are you currently not in employment and looking for work? If so, we would like to support you in your next steps back into employment and get a taste for one of the regions fastest growing sectors. We are keen to hear from young people, 50+, disabled, lone parents or those from an under-represented group.

The target is to become a zero-carbon city by 2038. That's why we're excited to be providing opportunities for you to gain skills, experience and knowledge in the green sector and move into jobs of the future.

**We are offering you fully paid work, with a "green" related organisation, at the Real Living Wage.**

## So, what are the benefits to you?

- Flexible hours/days (weekend work available)
- Real Living Wage, £9.90 per hour
- Training provided
- Fully supported by an Employability Coach
- Free travel passes for work travel

**Programme ends 30th November 2022, last placements 14th October 2022.**

Successful applicants will be offered sector-specific and employability training for jobs in the green sector.
