

# GREY N GREEN

Older people shaping a sustainable future

# **Are you 50 years old or over? Do you love and care about nature and the environment? You could make a real difference to the future of our planet!**

'Grey on Green', a project by Manchester Museum and Southway Housing Trust, will explore the contributions older people make to a sustainable world and change the misconception that this age group cares less about the environment than younger people.

A series of workshops will take place during 2021/2022 that will see people over-50 sharing sustainable everyday habits, exploring and learning from the museum's Natural History collections, and discussing their thoughts on the future.

This will result in a 'Grey on Green' guidebook filled with handy hints and tips to help others live more sustainably.

**If we work together, we can build a more sustainable world.**
