

CONSTRUCTIVE KICKABOUTS

Constructive Kickabout sessions provide local communities with the opportunity to access organised football games using facilities within their area. These sessions create a welcoming environment where individuals can socialise, connect with others and build relationships within their local community.

We host Constructive Kickabouts across all regions in which we operate. Alongside the football activities, these sessions also create space for meaningful conversations about the construction industry and potential career pathways.

Following each session, we offer advice, guidance and ongoing support to help participants explore employment opportunities and take their next steps towards a career in construction

Through kickabout sessions we have developed relationships with the EFL and professional football clubs.
