

# Queen Elizabeth II

On  Thursday  8th  September,  Queen Elizabeth II,  died.

 Queen Elizabeth was  96  years  old.

 Sometimes  when  people  are  old,  they can get  very  poorly  and  die.

 When  someone  dies,  their  heart  stops  beating,  they  stop  breathing,  their  brain  stops  thinking.

 Queen Elizabeth  lived a  very  long  and  happy  life  and  was the  longest  serving

 monarch  in  British  history.  She  was  queen  for  70  years.

 Lots of people  are  sad  about  Queen Elizabeth's  death.

 I  might  think  it is a bit  strange  for  people  to be  sad  about  someone  that they have

 never  met.

I will see lots of pictures of Queen Elizabeth on the TV and in newspapers

for a while. I might see people being sad or crying about Queen Elizabeth II

dying.

It is ok for me to feel normal or not sad about Queen Elizabeth, or I might

feel sad, or another feeling and that's ok too. All of my feelings are important and

ok.

I can ask my adults if I have any questions about Queen Elizabeth dying. They

will answer me honestly.

Queen Elizabeth lived a happy life and everyone feels happy about all of amazing things

she did and achieved.
