only wards with more than two cases will show last 7 days detail
direction of travel (DOT) compares current snapshot against previous

(current snapshot against previous snapshot)

Please note: numbers in recent days may rise, reflecting diagnostic and reporting turnaround time. All detail within this report is the latest data available prior to publishing (28/04/2021).

Week-to-week comparisons are based on the data available at the time each snapshot was published.

On 9 April there was a change to case reporting in England. Cases that have been identified through a positive rapid lateral flow test are now removed for people who took Polymerase Chain Reaction (PCR) tests within 3 days that were all negative. This resulted in the removal of 31 cases for Milton Keynes.
