

iHV Multiagency Fathers and Perinatal Mental Health Awareness

Perinatal mental health difficulties are those that occur during pregnancy and up to two years after the birth.

This multi-agency training delivered by Families in Mind and DadzClub is aimed at any professional working with families in the first 1,001 days.

Topics covered include: Underpinning policy and research; mental health conditions; identification and intervention; managing risk; and developing high quality, integrated and inclusive services.
