

Relational and Restorative Practice in Schools

The Summit Series 2025

The Summit Series 2025 has been created in consultation with colleagues in schools to support the embedding and development of Relational and Restorative Practice.

Each term there will be one 'themed' based session and one development session.

The **themed sessions** are for anyone leading on developing R&RP in their setting; we will hear from school leaders who have made progress in each themed area, with opportunities for questions and setting-specific application.

The **development sessions** are for senior and middle leaders using a coaching/action learning model to support the embedding of R&RP. Colleagues are welcome at one or all of the sessions as meets need.

Please circulate to/identify appropriate staff and encourage them to book their place(s).
