

### SEND Local Offer

We are working closely with parent carers, young people, and partners to relaunch the Local Offer. This collaborative approach ensures the refreshed offer is accessible, user-friendly, and truly meets the needs of our community.

In September, we conducted a survey to gather feedback from families and professionals on the [current local offer](#). Your insights are shaping the improvements we're making—because the Local Offer is not just a website; it's a shared resource designed by and for the people who use it.

The relaunch will include clearer navigation, updated content, and stronger links to support services and we will continue to involve families and partners throughout this process.
