

Private, Independent and Voluntary Organisations

Would you like to become a placement provider for healthcare students?

Adult Nursing
Physiotherapists
Children's Nursing
Mental Health Nursing
Occupational Therapists
Learning Disability Nursing

The students will apply their knowledge to practice and learn key skills required for registration. Learning in a contextual setting will develop a much needed health and social care workforce and may also encourage more healthcare professionals to work in alternative settings thus developing a diverse workforce.

- + Your staff can benefit from training opportunities when working alongside students
- + Students will share their learning which can enhance service provision
- + You may receive tariff payments for each student you support (we will discuss with you)
- + We will provide support throughout the placement setup and develop a toolkit with you
- + We will help you to engage with universities
- + We will support you in ensuring you have sufficient assessors and supervisors/educators within your placement
- + You will be able to develop your team through opportunities for staff to engage in critical inquiry and implement evidence based practice
- + You can enable your staff to evidence continuing professional development, and address the Professional, Statutory & Regulatory Standards
- + There will be opportunities to celebrate our collaborative success stories
