Overview of Community Mental Health Transformation

- [The NHS Community Mental Health Transformation - YouTube](#)
- The CMH Transformation aims to improve access and outcomes for individuals with Severe Mental Illness. The transformation covers the Integrated Care System and involves all partners involved in the delivery of care including NHS providers, Local Authority and Voluntary, Community and Social Enterprise (VCSE). Three key outcomes for the transformation are:
 1. Service users are able to access mental health care where and when they need it and are able to move through the system easily.
 2. Service users are able to manage their condition or move towards individualised recovery on their own terms.
 3. Service users are able to contribute to and be participants in the communities that sustain them, to whatever extent comfortable to them.

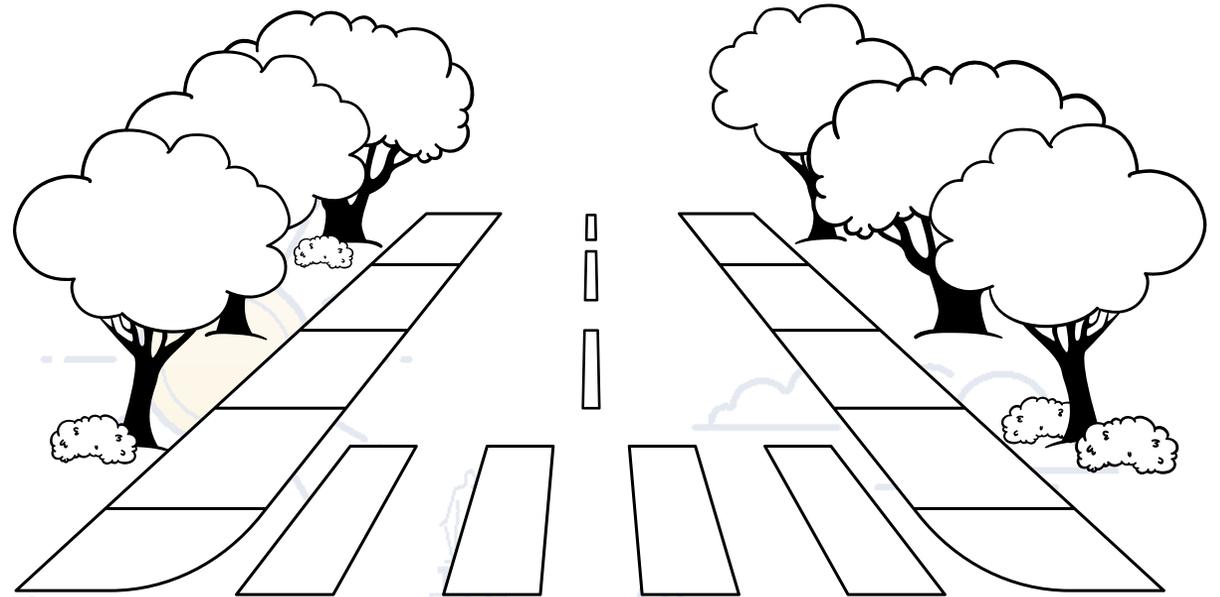

The Story So Far...

Patients as people: holistic lives, multiple factors,
prevention & recovery that is most effective for
individuals

VCSEs delivering and shaping support and services
which are:

- Local and asset based, building on what we have
and addressing gaps
- Integrated and mutually supportive - focussed on
the person

Part of broad rehabilitation and recovery pathways

Challenges

- DEMAND: everyone agreed that its about more than medication and clinical therapy, and broad themes were identified: housing, money and work, drugs & alcohol, physical health, someone to turn to...

But it has proven hard to triangulate the details of these issues and to say what exactly is needed, by who and where?

- SUPPLY: again broadly we are aware of VCSE organisations that are out there

But its been much harder to identify who and what is accessible, the informal networks and very small organisations, or to come to a consensus about what is and is not funded, and by whom it is, or should be funded by

- Involving residents with lived experience

What has been achieved?

MPFT teams re-aligned into service areas (North Shropshire, Central Shropshire, South Shropshire and Telford & Wrekin)

Pilot MDTs taking place in North Shropshire and Wrekin PCNs.

Building relationships between Health, Local Authority and Voluntary Sector.

Recruitment of staff working across PCNs and 'Secondary Care'.

Mobilisation of peer support workforce to develop a strong lived experience practice.

Initial engagement with VCSE colleagues.

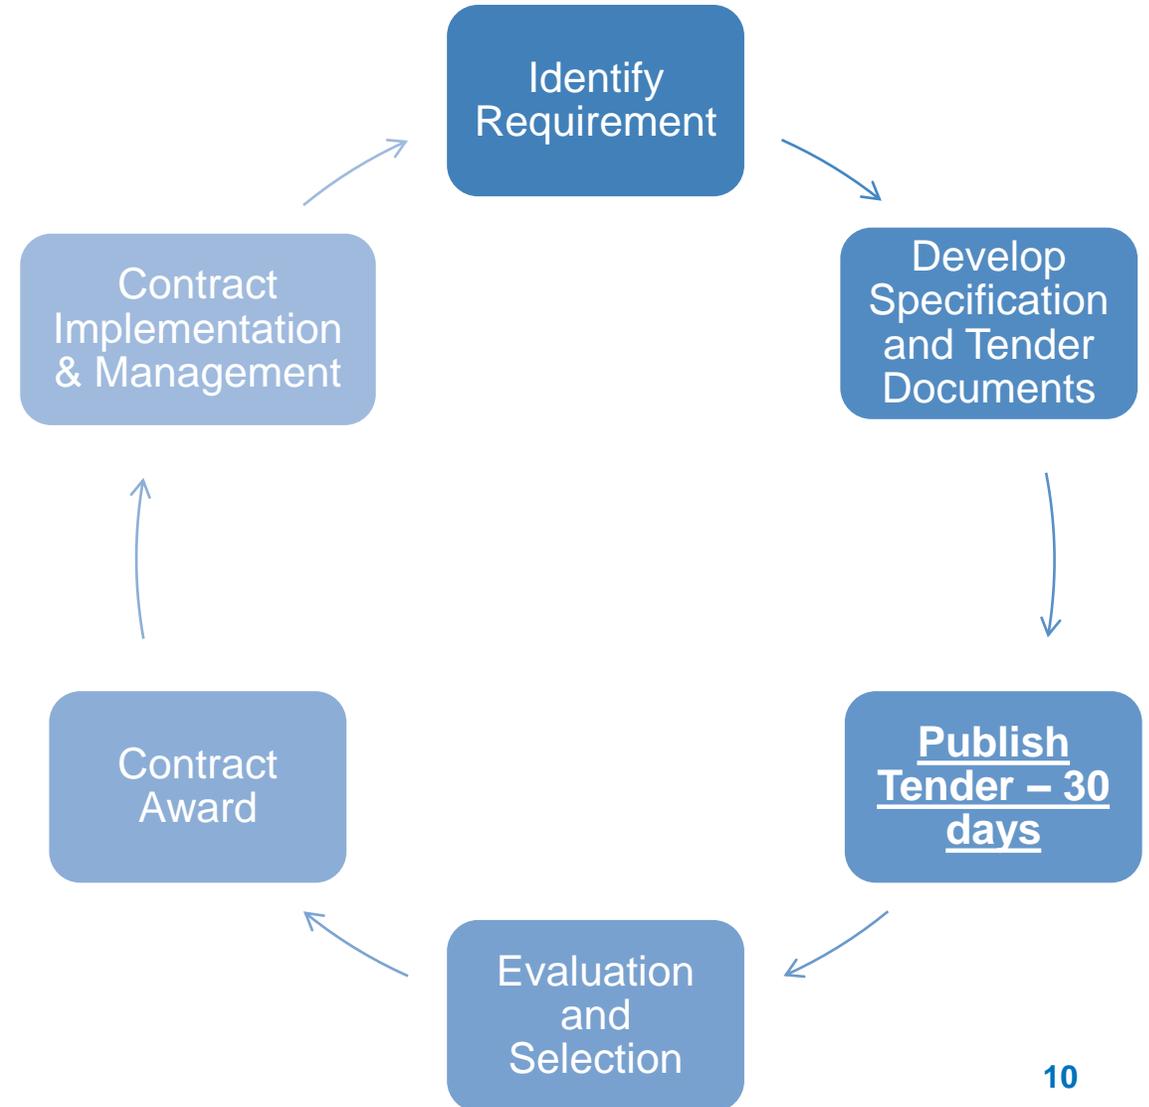

What next?

1. Development of plans for use of funding for VCSE Organisations.
2. Active exploration of grant funding for smaller and local VCSEs to support in their communities.
3. Further engagement to understand available provision and where the gaps are.

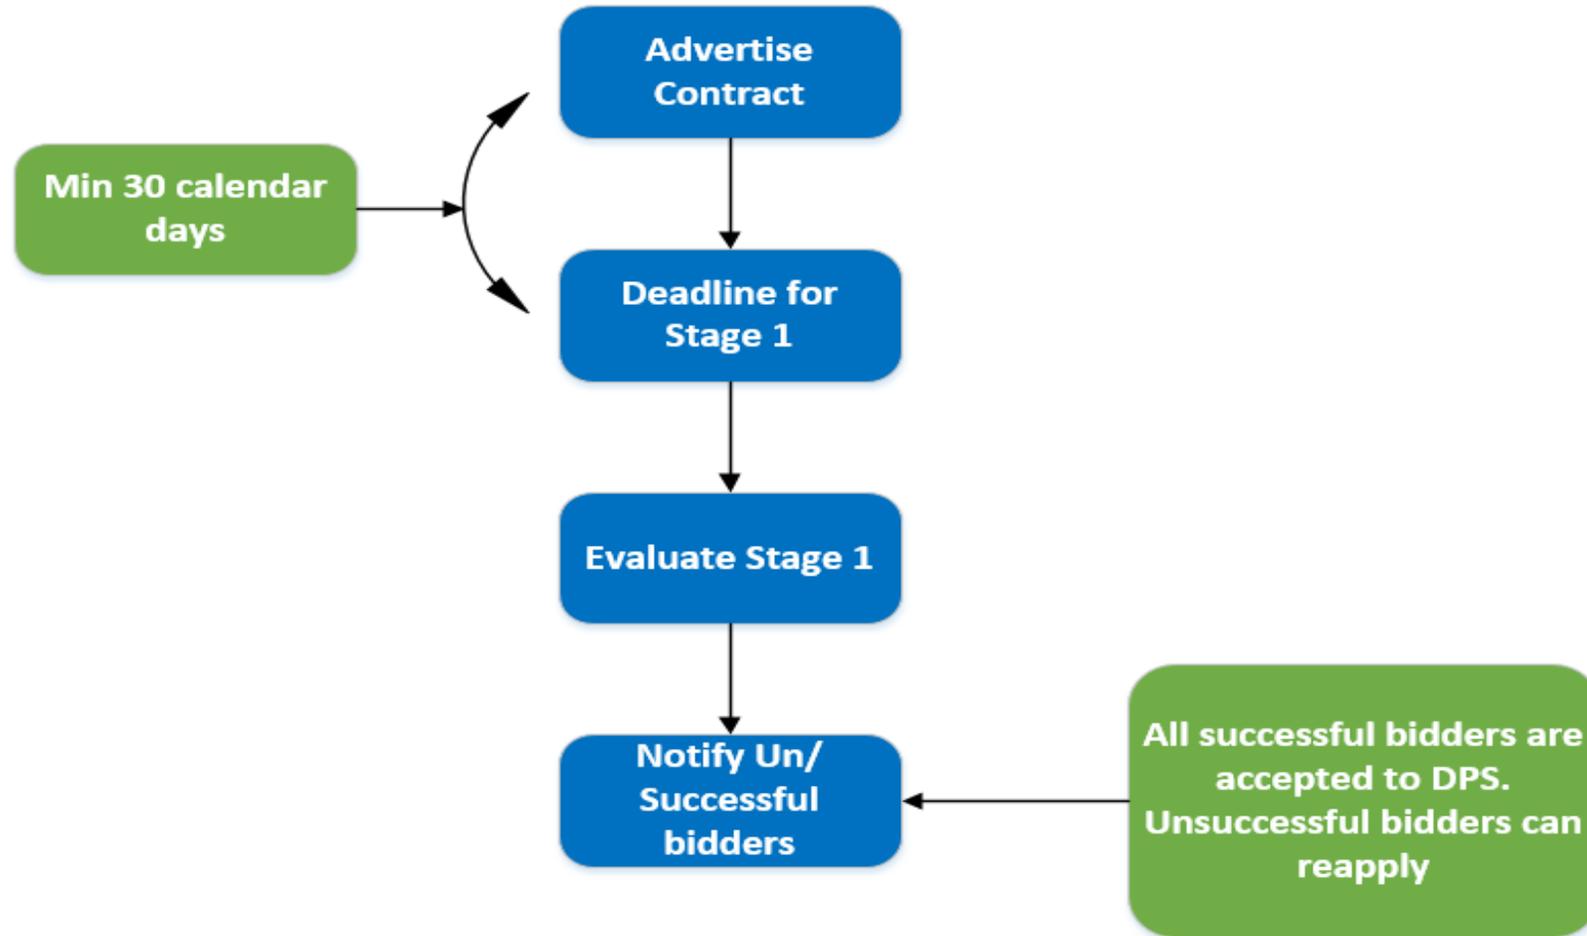

Dynamic Procurement System

- Complies with Procurement legislation
- A completely electronic process
- Is a two-stage procurement process
 - Initial setup stage - all suppliers who meet the selection criteria and are not excluded must be admitted to the DPS
 - second stage - the authority invites all suppliers on the DPS (or the relevant category within the DPS) to bid for the specific individual contracts.
- New suppliers can join at any time (must be actioned within 10 days)
- No limit on number of suppliers
- Streamlined process: suppliers don't have to demonstrate suitability and capability every time they wish to compete for a contract

DPS Stage One

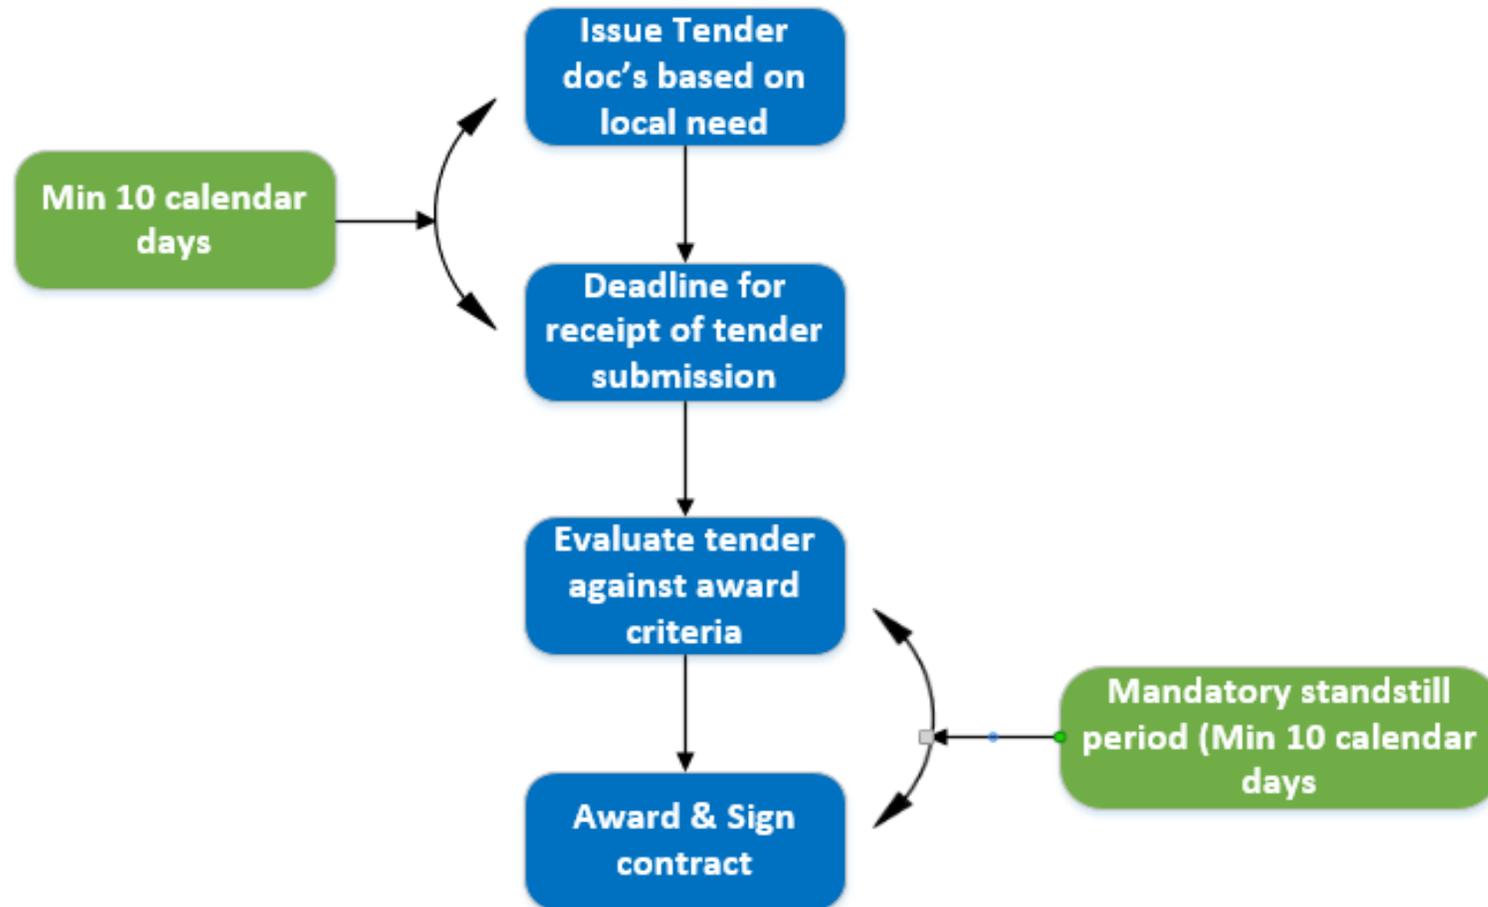

What does Stage One mean for you?

- A single procurement system for Shropshire, Telford and Wrekin – Community Mental Health Transformation
- Engagement with all providers
- Simplified Stage One questions - Inclusive process
- Unsuccessful bidders can re-apply
- Identification of services correctly commissioned
- Identification of gaps provision

DPS Stage Two

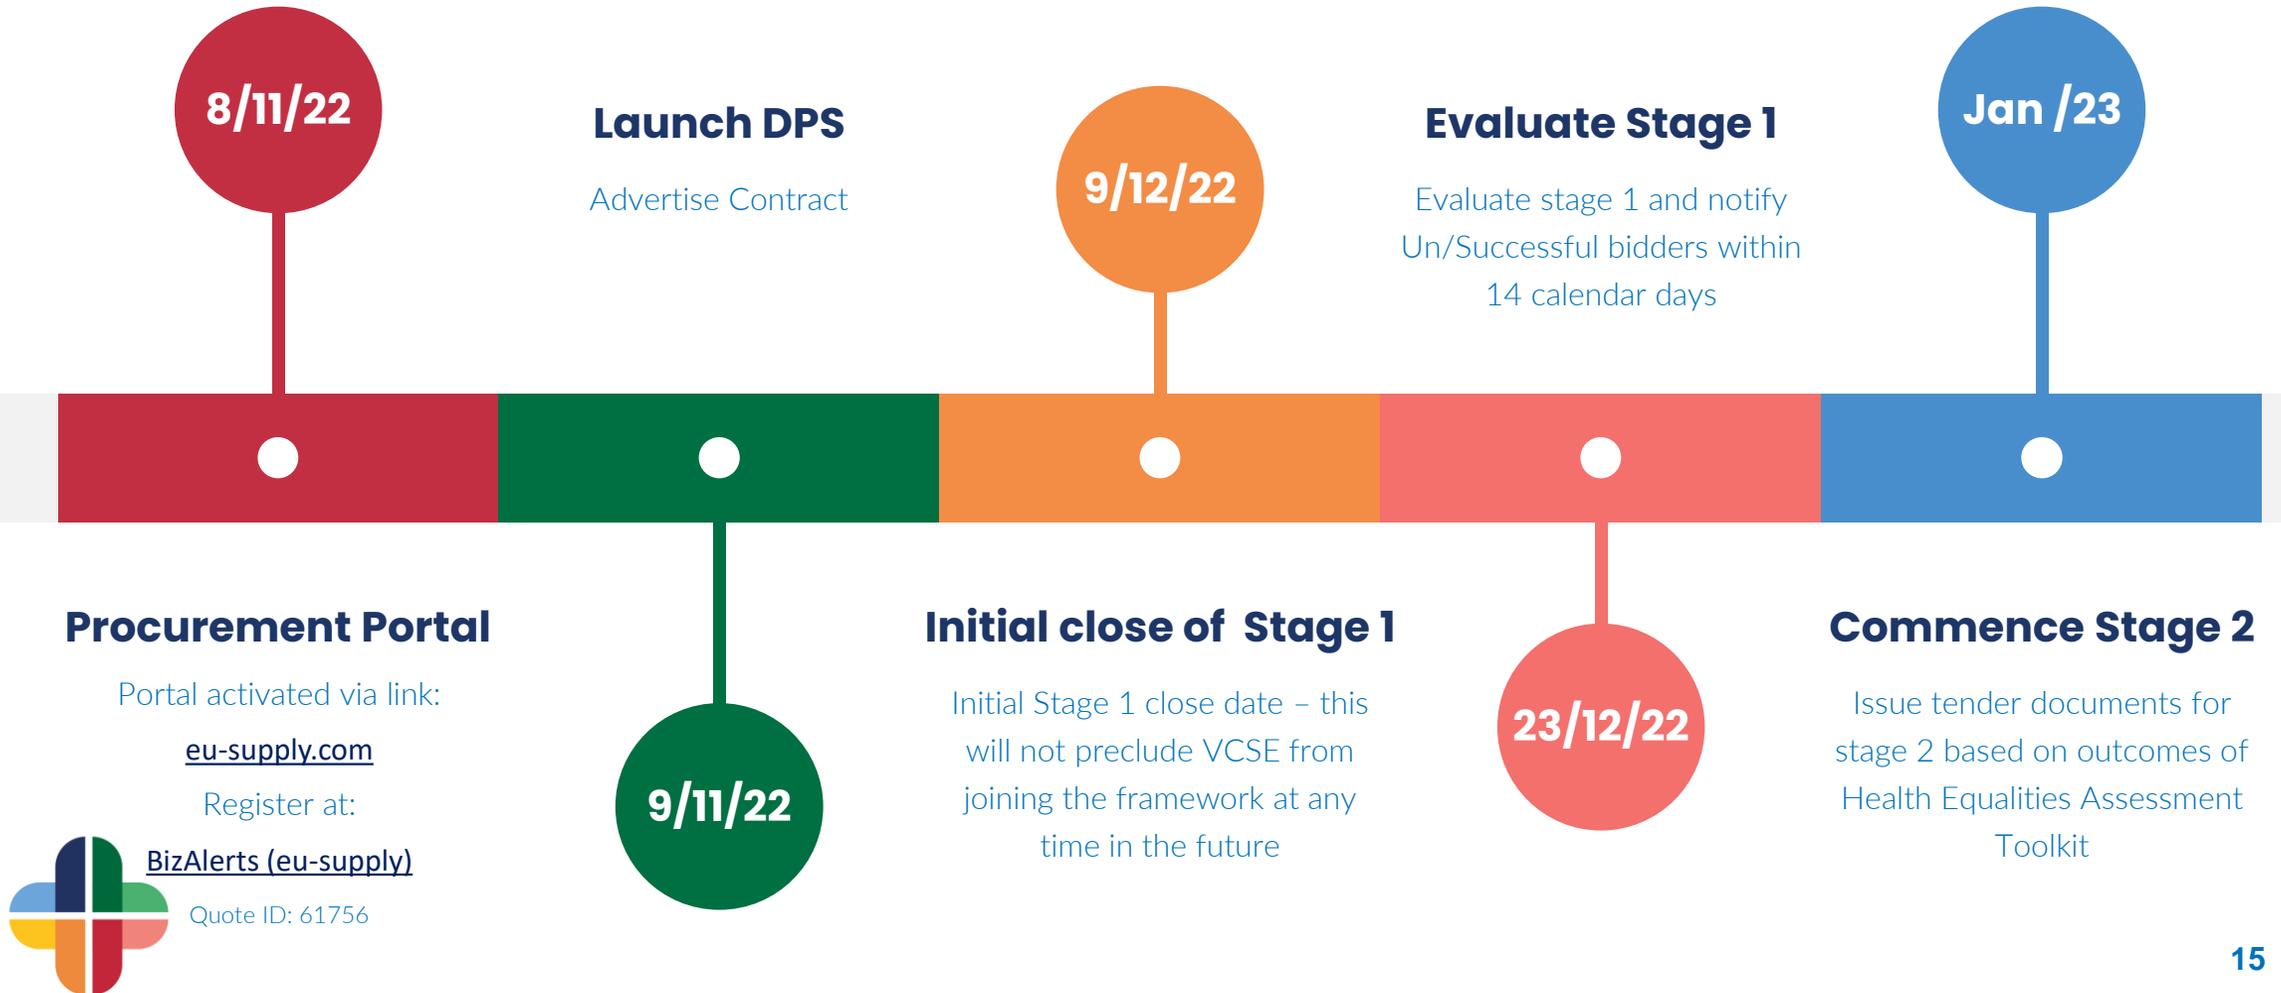

What does Stage Two mean for you?

- Dedicated VCSE support with procurement process
- Tender documents proportionate to tender value
- Localisation of service/support specifications as applicable and appropriate
- Flexible and responsive opportunities developing over 3 years as the programme grows and we learn from practice
