

Kingshurst Village Centre Regeneration

Road closure and diversions on Over Green Drive

To support the first phase of construction on the former Mountfort pub site our contractors will be carrying out a series of sewer diversion and upgrade works.

This will require a planned **12-week road closure** along **Over Green Drive** to be put in place from **Monday 25 September** ([Please see Traffic Management Map](#)).

This initial closure will restrict road traffic along Over Green Drive between the junction with Silver Birch Road and the junction with Marston Drive. A signposted diversion will be in place for all traffic (including bus services) along Silver Birch Road and Kingshurst Way.

After 4 weeks the junction of Marston Drive and Over Green Drive will be reopened to traffic however Over Green Drive will remain closed up to Silver Birch Road for a further 8 weeks. To control traffic a three-way traffic light will be in place on the junction of Over Green Drive and Silver Birch Road for the duration of the road closure.

Pedestrian access will be maintained throughout, and **special access arrangements** will be made for homes or businesses directly impacted by the closures.

Please note this will not impact businesses on Marston Drive, which will remain open. Parking will still be available on Marston Drive however road access will only be possible from Gilson Way. Access to the St Barnabas Church and Community Hall car park will be maintained.

Bus route diversion and temporary bus stop relocations will be overseen by Transport for West Midlands. Further information will be communicated as soon as these arrangements have been confirmed.

These arrangements and timings may be subject to change however we will ensure any changes are clearly communicated in advance. While we are taking every measure possible to limit the disruption, we would like to apologise for any inconvenience this closure may cause.

If you have any specific questions relating to the closure, please feel free to contact our contractors who are overseeing this phase of work. You can contact the Willmott Dixon site team on 01675 467 666.
