## Oral Health Promotion

The Oral Health Promotion Team are able to offer Early Years Settings support with dental care advice and prevention. We are working alongside West Sussex County Council to improve the oral health of 0-5s in the county.

We can offer a variety of free training sessions on the importance of good oral health, prevention of dental decay and common oral conditions to look out for. These can be arranged to suit you and your staff at your location.

We can also assist with 1:1 sessions for parents that are struggling with oral hygiene at home – particularly for those with an SEN, all of our team are Special Care Dental nurses with additional qualifications in Oral Health so are well equipped to help with tooth brushing/ diet etc.

Additionally, we are able to support settings of 0-5s with tooth brushing schemes and can visit a setting to provide information and tooth brushes.

If you require any further information or would like to book us to visit, please get in touch.
