Wednesday, May 24, 2023, 1-2:30pm ET

- Title: *Facility Site Review: Wastewater Treatment Plants*
- Presenter: Ken AuBuchon, US EPA Region 6, Houston
- Webinar Description: This webinar will walk through the objectives of a facility site review with illustrations and pictures and provide inspectors an understanding of the wastewater treatment processes used and how each process fits into an overall treatment scheme. We will assess the physical conditions of the treatment processes and operations and evaluate the operation and maintenance activities that impact plant performance. Finally, we will check the completeness and accuracy of performance/compliance records while determining whether the treatment units are achieving the required treatment efficiencies.
