

## **Market News Provides Historical Price Data Files on My Market News**

In the fourth quarter of 2020, the Market Analysis and Reporting Services (MARS) team developed a new interface to upload historical Excel and CSV price data files to *My Market News (MMN)*. The Cotton & Tobacco Program's Market News Division is responsible for the arduous task of transferring the data from a network server to the MMN platform.

The data sets that are being uploaded will make it easier for customers to create charts and graphs or download data into a database or analytical program for analysis.

Due to the large number of files to be uploaded, the expectation is to have the past two years completed by the beginning of the 2021-22 marketing year. This project will be ongoing until there at least five years available for customer access and reference. Historical files beyond the aforementioned timeframes are available upon request.

Below is a list of the available price data files on *My Market News*:
