New Validation on Pricing Changes for
Offshore Items for Domestic Commodity Solicitations

Previously, a price would inadvertently be entered for a final destination price on offshore items during the solicitation process, when the intent was to only enter a bid price to deliver product to the U.S. port location.

Now, Domestic Commodity solicitations include a new **Bidding for Offshore Final Destination** checkbox. This must be checked if a vendor is submitting an offer price for an offshore **final destination**. An error message will display when the checkbox is not selected. A vendor can verify their intentions and update their offer pricing, if needed.

Example: Export your offer to enter prices

Load Port Price: Column T is the Load Port Price delivered price per unit of measure to the US Port Location (such as Los Angeles, CA)

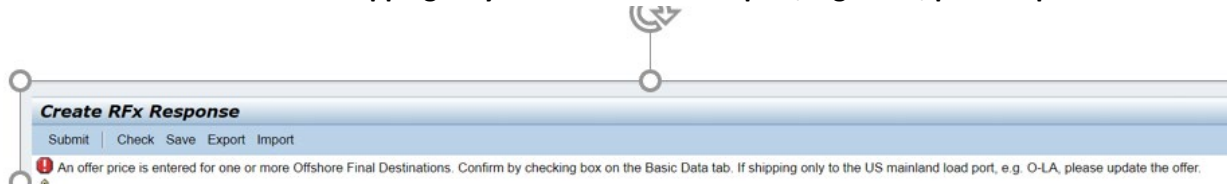

Price: Column U is the delivered price per unit of measure to the **Final Destination** (such as Hawaii)

Once the offer has been imported back into WBSCM, select check. If prices were entered to the **FINAL** destination, a new error message will display asking either to confirm intentions for the offshore pricing or correct offer.

Message: **An offer price is entered for one or more Offshore Final Destinations. Confirm by checking box on the Basic Data Tab. If shipping only to the US mainland port, e.g. O-LA, please update the offer.**

If intending to deliver to **FINAL** destination, under RFX Information tab>Basic Data tab, check the box “Bidding for Offshore Final Destination”

If bidding to the final offshore destination, user cannot submit the offer unless the box is checked.

Status and Statistics

Bidding for Offshore Final Destination?

Adjust Price: 0.0000

IF prices need to be corrected to bid to the US Port location, review the excel spreadsheet that was previous imported and make sure prices are entered in the correct fields. Once corrections are made, upload the offer and this will remove the error message and allow the offer to be submitted.

Note: You can filter the Offshore Column R for “Yes” to see all offshore orders and check to see if you have any prices in the Price column U for FINAL destination.
