

BRUSSELS SPROUT CATERPILLAR CRAFT

PREPARE

1

Gather several Brussels sprouts. Clean them thoroughly and cut them in half, using the flat surface as the base for the caterpillar.

SHAPE

2

Attach the halved Brussels sprouts together in a line, using glue, to form the body of the caterpillar on a piece of paper. Ensure they're attached firmly, creating the desired length.

DECORATE

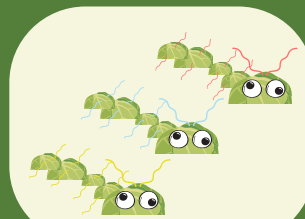

3

Glue googly eyes onto the first Brussels sprout at one end of the caterpillar to give it a cute face. Twist pipe cleaners and attach them as antennae on top of the head Brussels sprout. Cut pipe cleaners in fourths to make legs to add to the caterpillar.

DRY AND CLEAN UP

4

Let the glue dry and clean up the supplies. Display the craft for all to see!
