

# Trade Outreach Webinars

CBP hosts trade outreach events via free webinars to provide more timely and up-to-date information to the international trade community on CBP trade policy, as established by the agency.

CBP continues to offer live webinars that will be recorded and available for subsequent on-demand viewing over the Internet. The programs will consist of a high-level overview of the initiative, policy, or other topic, and will conclude with an opportunity for the trade to ask pertinent questions. To maximize the trade community's ability to ask questions during the webinars, the presentation portion will be limited to approximately 30 minutes.

Space is limited per webinar, so please pre-register using the CBP online registration process listed below. Although the trade outreach webinars are provided free of charge, CBP incurs a penalty fee for unused telephone lines per event. If for any reason you must cancel your registration, please submit your notice of cancellation via the online cancellation form 48 hours prior to the event.
