# Storm Possible Saturday into Tuesday (03/29-04/01)

March 26, 2025  
1900 UTC

**CALL TO ACTION:** Vessels should use caution or make avoidance plans depending on your vessel type and cargo.

## KEY MESSAGES:

- A strengthening low will approach the Washington and Oregon offshore waters Saturday night, then pass W and NW of the Washington waters Sunday night into Monday.
- A trailing cold front associated with the low will move across the Washington, Oregon and northern and central California waters Sunday and Sunday night.
- Gales over the northern California waters Saturday night, will move N and NE through the Washington and Oregon waters Sunday through Monday.
- Currently, a brief period of storm force winds are possible over the NW Oregon waters Sunday night. Nonetheless, storm force winds gusts are likely Sunday into early Monday.
- Keep abreast of the latest in the tropics and high seas marine weather information at [hurricanes.gov](https://hurricanes.gov) and [ocean.weather.gov](https://ocean.weather.gov). The next scheduled briefing will be issued Wednesday, April 2 by noon PDT, or 1900 UTC
