## The Cybersecurity and Infrastructure Security Agency & U.S. Fire Administration's (USFA's) Emergency Management and Response – Information Sharing and Analysis Center (EMR-ISAC) Webinar

DEFEND TODAY,  
SECURE TOMORROW

### EMERGENCY SERVICES SECTOR RESILIENCE DEVELOPMENT WEBINAR SERIES

The Emergency Services Sector Resilience Development Webinar Series (ESS - RDWS) is facilitated by the Emergency Services Sector Management Team and is a quarterly webinar series that focuses on topics of interest to ESS stakeholders.

### U.S. FIRE ADMINISTRATION'S (USFA'S) EMERGENCY MANAGEMENT AND RESPONSE – INFORMATION SHARING AND ANALYSIS CENTER (EMR-ISAC)

The U.S. Fire Administration's (USFA's) Emergency Management and Response – Information Sharing and Analysis Center (EMR-ISAC) works with the Department of Homeland Security's Cybersecurity and Infrastructure Security Agency, Office of Intelligence and Analysis, and the National Counterterrorism Center to advance information sharing and initiatives on behalf of the emergency services sector.

The EMR-ISAC administers the Emergency Services (ES) community on the Homeland Security Information Network (HSIN). With more than 3,000 active users, the emergency services community on HSIN-ES has become an information clearinghouse for emergency services professionals across the United States. Whether they need information about a significant incident, or are researching a potential threat to their jurisdiction, emergency services leaders know they can turn to HSIN-ES to get answers.

The EMR-ISAC publishes a weekly newsletter, the *InfoGram*, to 186,000+ members of the Emergency Services Sector from federal, state, local, tribal, and territorial organizations. Each edition contains timely and relevant information regarding responder safety, awareness, planning, prevention, education, training, and funding opportunities affecting emergency services sector personnel nationwide.

USFA's own Bruce Bouch and Shelly Kent, will present on the significance and value of the EMR-ISAC.

#### Intended Audience:

Our target audience for this webinar series is homeland security, public safety, emergency management and emergency response personnel.

#### Event Details:

Wednesday, August 28, 2024, at 1 p.m. EDT
